

Graphing a Path to the National Sites

Project Plan Guide

Name _____

My Tasks

The teacher will introduce the concept of graphs as well as model various types of graphs. You will then research how many national sites are located in your state as well as in one of the highlighted states. You will compare your findings and show the results on a graph format of your choice.

My Worksheets to Complete

___ How Many Sites Are There?

Project Option

You will create a bar graph, line graph, or pictograph from the information that you will collect on national sites using graphing software. The information will come from the research you collected on the “How Many Sites Are There?” worksheet.
