## Periodic Table Practice

**Directions:** Use available resources to find key information about the following elements. Use research to identify what metals are in circulating coins of today. (One cent, nickel, dime, quarter, half dollar, and the Golden Dollar<sup>®</sup>).

Element	Symbol	Atomic number	Atomic Weight (mass)	Melting point	Boiling point	Circulating coin(s) the metal is found in	Percentage of the metal in the circulating coin
silver							
nickel							
copper							
gold							
tin							
zinc							
iron							
platinum							
niobium							
titanium							
aluminum							

Use the information found in the “Periodic Table Scavenger Hunt” to write a brief summary about the elements silver and nickel noting why each metal was used to make the trime.
